The Challenge: Economical E-scrap Collection

Not all equipment is retired at the same time. It's too expensive to ship a few assets at a time, and you have no room to store old electronics. Sometimes you just need a Gaylord box on a pallet to fill up with e-scrap as it accumulates so you can easily ship it to a responsible recycler when it's ready.

PALLETPAK Service Solution

The PALLETPAK offers a convenient solution for small quantity electronic recycling needs. Shipped on demand, picked up on request—all managed online.

The PALLETPAK can hold up to 40 small computers, or 15 - 20 CRT monitors, (up to 1,000 lbs). You can dispose of everything from PCs, printers, monitors, hubs, routers, phones, and fax machines, or practically any old electronic equipment.

We provide a turnkey solution that enables you to have an e-scrap container shipped right to your location for your staff to fill up as assets come off line. When it's full, just call or login online to schedule a pick up of your PALLETPAK.

This turnkey solution makes it easy to do the right thing for the environment and keep your place of business free of clutter. It's the easiest way to take care of the e-scrap that accumulates in most offices.

As easy as 1-2-3...

- Order PALLETPAK kits online through our secure web portal.
- Kits are shipped out the next business day.
- Put your used electronics in the PALLETPAK as needed, then call or go online to schedule a pickup.

It's that simple.
