

REPAK Shipping Kits

Each complete asset return kit contains everything needed to pack & ship used electronics:

- Heavy duty shipping cartons, in a variety of sizes to accommodate a range of asset types;
- Strong inflatable air cushions for a flexible, custom fit every time;
- Packing tape, instructions, preaddressed shipping labels or any other inserts your program requires.

Available Sizes

- Laptop** (single laptop)
- Large** (CPU, LCD monitor)
- X-Large** (CPU & CRT)
- Jumbo** (CPU, CRT & printer)
- MultiPak** (up to 10 laptops)
- Custom Sizes** (upon request)

**The Challenge:
Few assets, many locations**

When your customer has multiple locations and too few assets for a pallet at each one—how do you collect them all efficiently?

REPAK Service Solution

ONEPAK's original REPAK Shipping Kits are the all-in-one pack & ship solution for return, repair, and recycling programs—the perfect solution for collecting small quantities of assets from multiple locations—as few as one at a time.

ONEPAK provides a turnkey solution that enables recyclers to bundle the delivery and return shipping of REPAK kits with their recycling fees. Sell it as a package for a do-it-yourself alternative when no pallet is needed, and we'll handle the details to ship out kits on demand with waybills preaddressed to your nearest facility.

Here's how it works:

- OnePak sets up your private-labeled online order form.
- Customers order REPAK kits online; you bill them directly.
- OnePak receives the orders electronically and ships out the kits.
- Customers pack their assets, apply your pre-addressed waybill.
- Carrier tracking number is activated and available online.

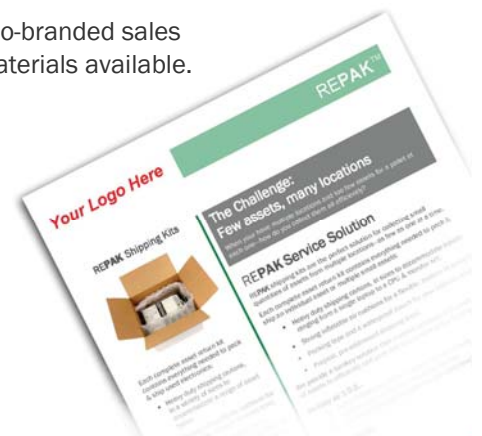

It's that simple.

We can also create zoned programs if you have multiple return facilities.

Co-branded sales materials available.
