| Custom Sizes | (upon request) |

The Challenge: Few assets, many locations

When you have multiple locations and too few assets for a pallet at each one—how do you collect them all efficiently?

REPAK Service Solution

REPAK shipping kits are the perfect solution for collecting small quantities of assets from multiple locations—as few as one at a time.

Each complete asset return kit contains everything needed to pack & ship an individual asset or multiple small assets:

- Heavy duty shipping cartons, in sizes to accommodate assets ranging from a single laptop to a CPU & monitor set;
- Strong inflatable air cushions for a flexible, custom fit every time;
- Packing tape and a waterproof pouch for your address label;
- Prepaid, pre-addressed shipping label.

We provide a turnkey solution that enables locations with small quantities of assets to efficiently self-pack and ship assets to our facilities.

As easy as 1-2-3...

1. Order REPAK kits online through our secure web portal.
2. Kits are shipped out the next business day.
3. You pack your assets, apply our pre-addressed return waybill.

It's that simple.
